VERSO

Case – POSITION AI DEVELOPER

1. Prepare a short AI strategy proposal that is tailored to VERSO (e.g. as a short slide deck or a text document).
   - What AI opportunities do you see for VERSO and our products? Which usecases can you imagine?
   - What architecture and tooling stack would you recommend?

2. Scenario: We want to extract structured information from uploaded invoices. Prototype a scalable service that can:
   a. Accept a document (PDF or TXT)
   b. Extract relevant data using an LLM
   c. Return structures JSON output

Please provide a link to a public repository of the finished task (github/bitbucket/gitlab).
